SUMMARY

Product designer with eight years of experience across graphic design, UI/UX and enterprise products. Spent six years at FarMart, progressing into ownership of connected procurement, sales, finance, warehouse and field workflows. Designed across FarMartOS and FarMart PRO, serving 250+ active users. Combines information architecture, interaction design and systems thinking to simplify complex products. Independently building design systems and exploring AI-assisted product delivery.

EXPERIENCE

Product Designer, FarMart Nov 2022 – Sep 2026

- Owned design flows and information architecture across FarMartOS and FarMart PRO, connecting web operations and mobile field workflows for 250+ active users.
- Designed onboarding, sales and purchase orders, delivery, dispatch, warehouse, invoicing, payments, deductions and reconciliation workflows.
- Structured connected experiences around procurement, sales, finance, warehouse and field-team responsibilities.
- Simplified forms, navigation and task sequences to clarify actions and reduce opportunities for operational mistakes.
- Designed dashboards and interfaces that make complex operational data easier to navigate and use.
- Worked on automated onboarding and instant invoice creation, making invoices available during execution rather than after a delay.

UI/UX & Graphic Designer, FarMart Jul 2020 – Oct 2022

- Joined as Graphic Designer in July 2020; moved into UI/UX in 2021.
- Built the FarMart App from scratch as the first designer in the domain, translating gathered inputs into mobile flows and clear navigation.
- Designed SMS tools and business ledger workflows; refined the experience through iterations, A/B tests and deployment feedback.
- Created social media creatives, website banners and promotional collateral during the graphic design phase.
- Applied consistent typography, colour, layout and visual hierarchy across digital assets.

Graphic Designer, Realmonkey Jul 2018 – Jun 2020

- Designed social media posts, campaign creatives and promotional graphics for digital marketing.
- Created website banners and supporting visual assets for online communication.
- Produced brochures, flyers and marketing collateral for digital and print.
- Adapted layouts across formats with consistent typography, colour, visual hierarchy and brand presentation.

PROJECTS

FarMartOS and FarMart PRO | Enterprise ecosystem

Designed connected web and mobile workflows across procurement, sales, warehouse and finance. Owned journeys from order creation through execution, payments, reconciliation and closure for 250+ active users.

FarMart App | Mobile business experience

Built the mobile experience from scratch around everyday business needs. Designed SMS and ledger features and refined navigation through iterations, A/B tests and deployment feedback.

SKILLS

Product and enterprise UX: complex workflows, user flows, information architecture, interaction design, dashboards.

Design systems: tokens, Figma variables, reusable components, variants, documentation.

Prototyping and iteration: wireframing, interactive prototyping, A/B testing, design refinement.

Visual and marketing design: typography, layout, brand consistency, social media, website assets, print collateral.

AI-assisted design: research, exploration, critique, coding assistance, human review.

TOOLS

Design and prototyping: Figma, Adobe XD, Sketch

Graphic design: Adobe Illustrator, Adobe Photoshop

Collaboration: GitHub, design and workflow documentation

AI and development: Codex, Claude Code, VS Code

EDUCATION

Bachelor of Arts (BA), Information Technology 2014 – 2017

Sri Guru Gobind Singh College, Sector 26, Chandigarh

Class 12, Information Technology 2012 – 2014

Govt. Model Sr. Sec. School, Sector 32, Chandigarh

Class 10 2000 – 2012

St. John's High School, Sector 26, Chandigarh

AWARDS

Director’s Commitment Award, FarMart 2026

Received at Dashak, FarMart’s 10th anniversary celebration, during a six-year tenure spanning graphic design, UI/UX and product design. The award included a travel and stay voucher.

PERSONAL PROJECTS

InterfaceOS | AI-ready design system · in development

Connecting Figma variables, design tokens, components and code across Primitive, Semantic, Theme, Responsive and Motion foundations. AI-assisted implementation with human design review.

DesignOS | AI-assisted design workflow · in development

Exploring a research-led workflow from understanding and research through exploration, design, critique, iteration and human approval.

EvidentOS | AI runtime governance · in development

Building approaches to verification, reliability, observability and governance for AI-driven UI systems, with checks and monitoring around execution.
